FROM THE MORILE DAILT ADVERTISER. I KNOW THOU ART FORSAKEN.

BY JULIA MILDRED HARRIS. I know thou art forsaken, Thy smile cannot disguise, For the shadow of a darkened soul Is in thy drooping eyes.

I know thou art forsaken, I know thy shivering sighs Are the echoes of a broken heart, Breaking before it dies. I know thou art forsaken-

Thy wild and wailing song,

Like music in a cavern, Sobs mysteriously along. I know thou art forsaken, Thy face looks cold and white, Like the hard ice of winter,

"Tis freezing to the sight. I know thou art forsaken-Thy long, neglected hair, Falls round thee, black and heavily,

Like the drapery of despair. I know thou art forsaken -Thou wanderest to and fro, "As though some voice was calling thee, And thou knewest not where to go.

I know thou art forsaken, All hopeless thou dost seem, As the lonely statue of despair, Kneeling by Lethe's stream. I know thou art forsaken; Oh lift thine eyes above, There Jesus is the bridegroom, The true and perfect love. Mobile, Jan. 28d, 1858.

THE CULTURE OF TOBACCO, &c.

land & Green, will be read with interest. It it from one of our first Tobacco Planters in this State :-Louisville Courier.

MONIGOMERY FARM, Trigg county, ? February 3d, 1853. GENTLEMEN :- In reply to your favor of the past . date, requesting us to give you some Tobacco seed, from which our best munufacturing article is produced, together with the most approved method of cultivating, curing and prizeing, we would respectfully state, that we have this day forwarded to you by steamboat, a box of yellow prior tobacco seed,

which kind we have found best for manufacturing purposes, from the fact that it has a broad fine leaf with small fibers, and in ripening it naturally nequires a yellow color, from whence its name is derived, and is susceptible of being cured with less fire than any other variety. The seed should be sowed in rich ground, tho-

roughly burnt and well prepared; the beds then tramped or rolled, and closely covered with fine the size of a half dollar, the brush should be removed. Much depends upon the nature of the soil and manner of cultivation. If the ground is very rich, the tobacco will be very large, and consequently coarse, and liable to fire or spot before it matures It is therefore best to grow manufacturing tobacco on fresh oak land. As soon as the plants are of sufficient size, they should be planted on hills about three and a half feet apart, and well cultivated until it arrives at the topping stage, the cultivation should then be discontinued. The plants then pinned to within six inches of the surface and topped to 8 or 10 leaves. It would be unnecessary to speak of the importance of keeping it free from worms and succors. A majority of the planters who aim at making the above description of tobacco fail in consequence of cutting it before it is thoroughly matured -too much importance cannot be attached to this suggestion, for the best management can never make a good article out of green tobacco.

If tobacco is cut in the heat of the day, it is apt to auburn, if cut in the morning whilst the dew is and trash; hence the evening is the most suitable time generally for cutting. It should be hung upon the sticks as soon as it can be done without braking: for it is a fact worthy of note, that the more tobacco is withered, the easier it is to be bruised. We find four feet and a half the most convenient length for a tobacco stick, upon which we hang seven plants. It should be crowded on the scaffold, and suffered to remain in that situation for about fortyeight hours, and then scattered so as to permit the air and rays of the sun to pass freely between the p'art. The length of time it is to remain on the scaffold must be determined by the state of the weather, if it could be entirely cured in the sun it would be all the better, but as soon as we discover there is a prospect for rain, it is to be carried to the barn, and placed upon the tear poles, leaving a space of twelve inches between the sticks. And now the process of firing is to commence, which forms a very critical period in the curing of tobacco for a few hours; bad management at this time will forever blast the prospect of making a fine article. Dry sound back is an excellent article to use at first, becanse it produces more heat in proportion to the quantity of smoke than almost any description of fuel except charcoal. The fires should be small at first and so distributed that the tobacco may receive as near as possible an equal portion of heat. The temperature of the house may be raised about as high as it is in the sun, and kept at that point from 24 to 36 hours. Dry, sound seasoned wood may be used, and the fires gradually increased. As soon as the leaf is entirely cured, the firing may be discontinued; unless the atmosphere is very damp, in which case it must be continued until the stack is cured also, otherwise the sap will pass from the stack into the leaf and change its color after it is cored.-Two important difficulties present themselves if it is suffered to hang too long-it will loose much, both of its fine color and texture; on the other hand, if it is put into bulk too soon it will carry with it all the bad effects of the smoke. In order to avoid each as much as possible, we think it advisable to take it down before the cold harsh weather of winter, assort it carefully, making three qualities; tie it up neatly, six leaves to the hand and bulk it down. In the spring, or when the weather becomes mild

and pleasant, we re-hang it, for the purpose of getting it in the proper order for prizing. A warm season is altogether essential for this purpose, and just as soon as it can be handled without cracking the leaf, it is to be taken down and put in bulk again-it is then ready to go in the hogshead. We make our hogsheads 56 inches in length, and 44 inches in diameter, which is much larger than those generally used by planters of your portion of the designed for your market, when it is intended for the New Orleans market from 1800 to 2,000 pounds. Much more might be said in detail upon the subject of the culture and management of fine tobacco, but we deem it unnecessary at present. We shall be pleased at all times to hear from you.

Very respectfully, yours, T. M. Wooldbridge & Son,

Curious Perimon.—The following petition was resented to the Massachusetts Legislature last week by Dr. Cogswell, and referred to a committee. It created considerable merriment:

"To the Honorable Senate and House, &c. The undersigned, a citizen and legal voter of said Commonwealth, humbly praying to your honorable body as hereinafter stated, complains that he this winter purchased, at great expense, a drab-colored overcoat; that having said coat on his person, he was solicited by his children to attend the Museum kept by Moses Kimball, a brother reformer, and, while in attendance at said Museum, said coat was besmeared with tobacco juice ejected from the month of a filthy citizen in the rear, and completely spoiled. Wherefore, the undersigned prays your honorable body to enact a statute prohibiting the use of tobacco, in any form, in public places of amusement. And he will ever pray, &c. Jos. A. WILLARD. Jan. 27, 1853, Cambridge."

The Boston Post says: A petition, it is said, is in circulation against the have acted upon the bill against the use of tabacco, | num to the leasors.

NASHVILLE, TENN.

THURSDAY MORNING, FEBRUARY 17.

OUR FOREIGN RELATIONS.

The state of our relations with foreign governments is of such really delicate nature, that the greatest circumspection will be necessary to prevent serious collisions. That Gen. PIERCE will be found equal to the emergencies of the high position he occapies, is a fact upon which we do not think there can exist any reasonable doubt, with any acquainted with the incidents of his life or the sterling traits of his character. The Jackson rule will be his rule, "ask nothing but what is right, and submit to nothing that is wrong."

Besides the general feverish and heaving state of of European affairs, we have unsettled, a Central American question with England, made more critical by the differences existing among our statesmen as to the construction of the Monroe doctrine, and the blunders of whig diplomacy. In this connection we copy the following extract from the New

York Tribune: Honduras.—The telegraph yesterday informed us that the State of Honduras had taken possession of "the English settlement of Limas," and had determined to hold it by force. This place Limas is a mahogany cutting establishment on, or near, the River Roman. The "English consul general in Mosquito," went up to Limas in an English vessel of war, about two years ago, and hauled down the flag of Honduras. This was done after the ratification of the Clayton and Bulwer Treaty; but the occurrence does not seem to have been noticed by our Government. It is said that Honduras meditates a forcible rescue of Ruatan, with a view of testing the guarantees of the United States, as respects colonization in Central America. The river Roman, it should be remembered, flows

In addition to this difficulty with England, com-The following letter addressed to Messrs. Row- plicated as it is, by whig diplomacy, we also have the Tehuantepec affair with Mexico. These are | lutions, but favored the application in regard to the plain and practical issues between our government | English Colony of Bay Islands. Mr. Cass replied. and those of Mexico and England. The tameness of our past policy will be found a serious embarrassment to any honorable adjustment of these mat-

into the sea near Truxillo, the principal port of Hon-

ters, and may lead to solemn involvements. With nations as with individuals there are causes justifying a resort to the last arbitrament of life against life. It certainly is to be hoped that no such necessity will arise, and we are confident, that if these conflicts can be honorably settled-without war, it will be done. If not, Pierce like Polk will take the responsibility of vindicating national honor, and leave his conduct to the approval of the people.

Whig papers are full of such miserable cant as "Young America" and "old fogies." We are not aware that there is any such line of demarcation brush to protect the young plants from frost and the | between members of the same party. All united drying winds of spring. After the plants are about in the election of Gen. Pience. And all will be ound equally ready to give a cordial and consistent support to his administration. The only hope for whigs ever again to regain power is by democratic | world. He is better acquainted with European divisions. We cannot believe that democrats will be foolish enough to gratify whigs by permitting these dissensions. Such a course would be absolutely suicidal, and unworthy a great and victorious

> The Shelbyville Ecositor says that East Tennessee is entitled to the whig candidate for Governor, and that Hon. J. H. CROZIER is the man. Well, if he is man trot him out.

I'm Ira Alridge, the negroe tragedian, from America, is now acting at Berlin. He is favorably criticised in the Augsburg Allgemeine Zeitung. His Othello is said to be as new to European play-go- tack it over and over again to everything else? on it, is liable to break and be disfigured by dirt | ers as it is true to nature; that is, to the nature of the negro. His acting is said to be remarkable, physically and psychologically.

> FATAL RENCONTRE.—The telegraph informs us that a rencontre occurred at Sommerville night before last, between Mr. Holdridge, a stage driver. and Mr. Kent, a saddler. The latter was shot and killed instantly. The particulars of the affair were not given .- Memphis Whig.

The Baltimore American says that the great straight line railroad from Baltimore through Cincinnati to St. Louis is in steady process of construc tion. From St. Louis to Cincinnati the whole line is under contract. Between Cincinnati and Parkersburg the middle division of the Cincinnati, Hillsborough and Parkersburg Railroad was to have been let to contractors on the first instant.

RICHMOND, Feb. 9,-The Legislature of this State has rejected the bill appropriating half a million dollors annually for six years, for the construction of a railroad to the Ohio river.

The train of ears from Petersburg ran off the track yesterday, whereby three of the cars were smashed. Fortunately no one was seriously in-

pointed A. M. Phillips inspector of boilers of steamers, at Wheeling, Va., at a salary of \$500. Charles | cadetship in an engineer corps. He afterwards en-Bradley, assistant appraiser at Boston, salary \$2,- tered the Swedish army, and was employed in the

commissioner of the land office.

EDITOR SHOT.—We learn that Mr. Ledbetter, editer of the Panela Picayune, was shot on Monday last by Mr. Fleeger, formerly a merchant of that place. The cause was an alleged interference in Ledbetter passed Fleeger's house, in a very suspicious manner, and in accordance with a note he had written, the latter fired the contents of a double barrelled gun at him, killing him almost instantly. Mr. F, surrendered himself to the proper authorities, and, after an investigation of the facts, was held to bail in the sum of \$1,000. Mr. F. is well State. We aim to put in about 1,400 pounds when known by many of our merchants, and has always tion. Fox, whose name is identified with the sucsustained a good character.-Memphis Whig.

> that this company, now applying to the New York Legislature for act of incorporation, have made arrangements with Norms & Co., of Philadelphia, to put up works to manufacture motive power for their road, and with HEWITT & COOPER, of New Jersey, to roll the iron rail, at the iron mountain in Missouri. Wells & Co., A. S. Divin & Co., with others, have contracted to build 1,000 miles of the road within 24 months, to be six feet guage and double track. The company expect the government will loan them \$45,000 per mile. If so, the probability is the road will be built in less than five

> REAL ESTATE IN NEW YORK.—The New York Express publishes the following item, in illustration of the value of real estate in certain parts of that

The property at the corner of Broadway and Fulton streets, noticed a short time since as having been leased for 21 years at the rate of \$14,000 per annum, with a forfeiture of the improvements at the end of the lease, costing at least \$30,000, was esteemed an enormous rate. The improvements use of pork and beans as an article of food on Sun- have been planned, and leases granted on various day, because their preparation is a desecration of apartments, yielding a rental of \$32,000, and sevethe Sabbath. It is numerously signed, and is to be presented to the general court as soon as they peeted, will yield a net income of \$20,000 per auBY TELEGRAPH.

New York, Feb. 15.—The Niagara has arrived. Cotton, demand good; advanced 1. Week's sale 55,000; export 5,000, speculation 14,000. Fair Orleans 63; Middling 53; Fair Upland 6; Middling 53. Fair and good fair have improved most, every now and then Breadstuffs of all kinds declined; wheat 2d; flour crat, and becomes as 1s; eorn 1s. Pork has advanced 1a2s. Bacon wanted; lard dull. Iron quiet.

In Havre cotton advanced 11 francs. Sales of the week 14,000 bales. It is rumored that Francis Barring will succeed Mr. Gladstone as chancellor of Exchequer. Hash & Co., of Rotterdam, have failed for £25,-

000, in consequence of Priest's forgeries.

The weather in England and Ireland has been fa-Great preparations are making for Napoleon's marriage. It is rumored that there will be a fur-

ther reduction of the army after the marriage. The new Cabinet will not retain any one who opposed the marriage. The Turks are about to invest the Montenegrins with 30,000 troops. It is thought that Russia will

Austrilia is sending troops to Palmatia. New York, Feb. 15, P. M .- The ship "Ericsson"

cleared for Norfolk. CONCORD, Feb. 15 .- General Pierce left Concord , for Washington. He will be in New York to-morrow. There will be no demonstrations. The Cabinet has been definitely formed, but is unknown to all save those appointed.

Washington, Feb. 15 .-- The House on Monday next meets at 11 o'clock, A. M., and holds no evenng session hereafter. Mr. Davis reported a bill adjusting the difficulties

growing out of the sale of swamp lands by general Government, granted to the States. The bill was debated, laid on the table; after which the House

In the Senate the deficiency bill was debated, the amendments for light houses on Pacific Coast were taken out. Afternoon the Monroe doctrine resoutions were debated. Mr. Douglas said, in regard to Cuba: He wanted to leave her alone as long as she remained loyal to Spain, if she asserts her independence and demands admission, if Spain will sell, he is for her purchase. He opposed the reso-

CORRESPONDENCE OF THE BALTIMORE SEX. Debate on the Tehnantepec Resolutions—Calch Challing— The Next Secretary of State-Bennett's Land Bill, de. Washington, Feb. 8, 1853.

The Tehuantepec resolutions of Mr. Mason were to-day dreadfully opposed by the man of peace abroad and war at home; but all such attacks will only strengthen them. Gen. Cass' resolutions, and Mr. Mason's, are strong with the people, and this fact alone will help them through Congress. Evepublic opinion to break through legislative prejudices or party combinations in the National Parliament. All these matters will receive a new impetus by the new administration, if they should not be concluded under the present one,

Some of the papers have just found out that I was not very far out of the way when, early in December last, I introduced the name of Caleb in connection with an important cabi appointment. Gen. Cushing is one of the best educated men, not only of America but of the civilized politics, and with the politics and history of this entire continent, than, perhaps, any man willing to accept office under Gen. Pierce, and would either make-an excellent Secretary of State, or a shrewd. sagacious, far-seeing Minister to France.

Mr. Cushing published an excellent work, many years since, on the position of Europe since 1830, which, if I mistake not, was translated into several European languages, and has collected most valuable materials for his forthcoming works on Mexico and the Celestial Empire. Either Senator Mason, of Virginia, the Hon. George M. Dallas, of Pennsylvania, or Caleb Cushing, of Massachusetts, will be the next premier.

Mr. Bennett's Land Distribution Bill continues the bug bear of the session. Why should the friends of that bill who know that it cannot pass the Senate,

THE RIPLEY TRAGEDY .- Robert Peters, who was shot by Chas. Baird, whose sister he had seduced and refused to marry, was still living when the Kenton passed Ripley, but there was little probability of his recovery. Baird was in California when the news of his sister's ruin reached him; he immediately left his business, and scarcely took rest or food till he reached Ripley. He sought an interview with Peters and used every argument and entreaty to induce him to make the only reparation left possible. He finally offered Peters \$3,000 of his hard earnings if he would marry his sister. When this was refused Baird drew a pistol and shot the seducer, as he frankly avers, of killing him on the spot. The utmost sympathy is felt for Baird and his sister. Peters is a tailor, and formerly worked in this city. He has been punished, if not as he ought to have been, yet in a way which the natural feelings of almost every brother will justify. Cincinnati Gazette.

JOHN ERICSSON.

John Eriesson, the inventor of the Calorie Ship, was born in Sweden, in 1803, and is therefore fifty years of age. He is of a muscular, well developed, strongly knit frame, and has a finely developed phrenologically speaking. The Literary World gives an interesting sketch of his history, from which we learn that he early showed a taste Washington, Feb. 9.—Secretary Corwin has ap- for mechanics, and at the age of eleven he attracted the notice of Count Platen, who obtained for him a survey of Northern Sweden. While occupied with Gorman, of Indiana, is vigorously pushing for this favorite study of mechanics, he projected his flame engine. In 1826 he visited England. While there in 1829, he competed for the prize offered by the Liverpool and Manchester Railway, for the best locomotive, and produced the wonderful speed, at improving in health, and is now considered out of that time, of fifty miles an hour. His propellor, his semi-cylindrical engine, his centrifugal blower, his distance instrument for measuring distances at sea, his hydrotastic guage, his pyrometer, and other ingenius inventions, have already made the name of Ericsson famous in the scientific world. The caloric engine, which has now arrived at the consumthe domestic matters of the latter's family. As | mation of success, was first brought before the scientific world of London twenty years ago, and was rejected by men of science as an impractibility, and as involving the absurdity of perpetual motion .-Farady, Brunel and Ure, after a short resistance, finally conceded the practibility of the invention, and Farady endorsed the caloric engine in those famous lectures of his, before the Lordon Institacess of the great London Exhibition, was apupil of

THE PACIFIC BAILROAD COMPANY .- It is stated | It is well to give credit to those who really prove, by their labors, benefactors of their kind nor should those who aim to be such, though failing, be passed over in silence. Whether the subject of this brief notice is to rank with the first or the last, is yet uncertain, though his chances for the niche in the temple of fame would seem to be flattering. Till his engine shall have displaced those now in use on our oceans and rivers, his success cannot be assumed, nor the high honor claimed for him be properly accorded.—Pittsburg Post.

THE THEATRE.-Mr. ROBERTS is filling an engagement at the Adelphi with distinguished credit to himself. Mr. R. is an actor of a high and unquestioned order of genius, and our citizens should give him a cordial and substantial encouragement. We have seen him in Richelieu and Hamlet, in both of which peices he won deserved applause. The play to-night, is, the Corsican Brothers. This play has never been acted in Nashville.

The "Fashionables" may be interested to know that a change has taken place in London and Paris in the fashion of men's garments. Overcoats and frockcoats are made to reach to the knees, and the pantaloons are full and long.

We are indebted to Weller, of the Aleonia. for late St. Louis papers.

SPIRIT OF THE PRESS.

The Banner contains no editorial beyond a fet lines. It publishes a quite full synopsis of the speec of Senator Clemens, of Alabama. Our neighbor every now and then takes a liking to some demo

"Fond and billing, As William and Mary on a shilling." It, however, lasts but a short time. His nature devouring propensities return, and he goes t

slaughtering democrats, with as little mercy as

Cincinnati butcher feels for hogs. The American publishes an article on Disunior

and also other short editorial paragraphs. The True Whig contains an article on "Danie S. Dickenson, Done For," and also on "old Fogy ism and Young America Harmonizing." These ar congenial themes for our neighbor. These little things are the scandal of politics, and our neighbo jumps upon them with the natural instinct of haw upon a chicken. He relishes them. He digest them. And it really seems, as if he understoothem. Well, there is no disputing about tastes .-We leave our neighbor to vibrate, as best pleases himself between "young America" and "old Fogyism." We only lope he wont fall on our side.

The Gazette contains an article on Railroads,-Our neighbor's ideas of internal improvement do not seem to be very well matured. We would, and we do it in all kindness and respect, advise him to study such practical subjects more, and these College-like essays less. We honestly consider him a young gentleman of decided talent. All he wants is training, and even at the hazard of offending him, we intend to do that. We do hate to see men who have good heads and good hearts, (and Mr. Maney, of the Gazette, has both,) frittering away their intellectupon academical essays. Be practical. Better be wrong than be nothing.

COMMERCIAL.

NASHVILLE, Feb. 17. WEEKLY REVIEW OF THE MARKET. The weather for the past week has been for the most part, excessively cold Tuesday, however, there was a breaking

off, and rain fell copiously during the entire day. Business has tot been as active during the week as might have been reasonably expected, in view of the high stage of the river. New Orienns boats have been arriving and departing continually, and a large amount of Cotton and Tobacco have gone forward.

Corrox.-The week's business has been small, owing in part to the small quantity offering, and in part to a disposition on the part of buyers to hold off; regarding the ruling ry great measure requires an outside pressure of rates as too high. We left the market doll at the close of our last Weekly Review, in the small sales at 75cas 60. Thursday there was no improvement, and we heard of no material change in quotations. Friday there was a rather more active demand, though the small quantity on the market limited transactions. Sales were made at 8 65. Saturday the demand continued good, and sales were made at 8 65, and a small lot of extra fine brought 876. Monday there was nothing doing, buyers being disposed to hold off in anticipation of the Ningara's news, which was made public on Tuesday morning, giving accounts of an advance of 36 in Liverpool. Sales on Tuesday reached about 200 bales,

Yesterday there was very little doing. About 100 bales

The receipts of the week amount to 1486, against 2878 for the same time last year, showing a falling off this year of 1392. The total receipts since 1st Sept. amount to 80,314, against 24,411 for the same time last year.

Tobacco.—Sales are being made almost daily at the different warehouses. Prices vary from \$3 to \$6 according to quality. The best sale of the season so far was made on Saturday of 3 hinds at 5 00, 6 00 and 6 05. On Tuesday 18 hhds sold at Johnson & Horn's as follows: Nine libds,, the erop of J. J. Williams, of Williamson county, sold at 8 95, 5 25, 5 35, 5 at 5 50, and 1 at 5 70. Four other hhds sold at

Yesterday sales reached 40 hhds, as follows: 20 bhds, at Johnson & Horne's at 4 66 to 5 80; 14 at A. Hamilton's at an average of 4 65, and 6 at an average of 5 70.

Grocenes-The trade for the week has not been materially affected. The high stage of the river has given us some business from the up-trade, and the railroad continues to bring in customers from the eastern division of the State. We submit our quotations with but very slight

NINETY TOWN LOTS WILL BE SOLD AT AUCTION On Tuesday, 15th March, 1853. junction of the Memphis and Charleston, and the Nash. ville and Chattanooga Radroads, 250 miles from Memphis, 113 miles from Nashville, and as miles from Chattareogu, and in Jackson county, Alabama. This place is at the point of Cumberland Mountain, situated on the margin of one of the richest valleys of Tennesson river, and surrounded by forests of the best fimber in the Umon, and from and coul to an unlimited extent. The Nashville and Chattanooga railroad has been finished to and past that point from Nashville, and the part of this road between Stevenson and Champoo-ga will be done by July next, and the Memphis and Charleston road from this point to the feet of the Muscle Shoals, a distance of 170 miles, is all under contract, and far advanced or finished, and will all be done in 10 to 18 months. The Selma road will enter the Nashville and Chattaneoga railread a few miles beyond Stevenson, and the connection at Chattanooga with the East Tennessee and Virginia roads, the Georgia, Alabama and South Carolina roads, and the Selma road this side, and with the South-west through the Memphis and Charleston road, connecting with the New Orleans and Nashville, and Mobile and Ohio railroads, and by the Nashville and Chattanooga road to Nashville with all the North and North-west valley of the Mississippi, gives Stevenson a

cial point, and justifies, we think, the prospect of a large city, Water, one of the vital necessaries of life, flows out of the mountain at this place in great abundance for all local puroses, and to supply any number of steam engines; and of the finest freestone and limestone.

This point is healthy, and combines the scenery of Switzerland with the climate of Italy, connecting mountain and valley. The rich lands and minerals, are here in immediate

most commanding position for a manufacturing and commer-

contact, with all these railroad: to carry the products of either to market, in any direction. There is already a thriving little village at this place, all built in a few mouths, and great desire to buy on the part of parties at a distance. This sale is advertised to give all a chance at public sale, which will take place as above stated, on Tuesday, the 15th day of March next, commencing at 10 This place is, in point of railroad connection, simularly

situated to Atlanta, Ga., but much more advantageously, i regard to product iveness of soil and coal and iron, which surround it, and Atlanta, now six years old, has a population of over 6000 of the most thrifly people in this Union. Persons wishing to attend this sale, can reach Stevenson daily by steambosta from East Tennescee, South Carolina and Georgia by way of Chattanooga, and from Alabama by a daily line of steamers from Decatur, and a daily line of railroad cars from Nashville, Tennessee.

One-tenth of the purchase money will be required to be paid down, or a good well secured note at not over 4 months, as may be agreed upon, and the balance in one and two years with a hen retained on the ground to secure payment. Plans will be exhibited on the day of sale. J. F. ANDERSON & CO.
